News Release For Immediate Release

SST matches employee gifts to help with Katrina Relief Efforts

Disaster hit close to home for four SST employees when Hurricane Katrina ravaged the Gulf Coast on August 29, 2005. One has completely lost their home, while the other three experienced significant damage to their homes and property.

In an effort to help, Security Services & Technologies set up a voluntary employee support fund to aid the SST employees in and around the New Orleans area affected by Hurricane Katrina. SST matched one dollar for every dollar donated by the employees. In addition, FirstService Corporation (which SST is a division of) also matched the money raised dollar for dollar. Close to \$25,000 (including the matching contributions) has been raised thus far. This money will go to help the four employees to rebuild their lives and homes.

Additional funds are being contributed by SST's sister company, Intercon Security of Canada. FirstService Corporation has agreed to match these funds raised as well. Results of this drive won't be concluded until the end of December.
